

1 Lexical selection

real Norvig frequency ranks

sampled words shown in the figure

offenders	tyranny	dubious	circulate	precipitated
10,104	19,906	23,071	26,691	39,823

2 Context pairing

human prefix C with target word w

Dessave to hold an inquiry and punish the

-> **offenders** rank 10,104

innovations of Tudor

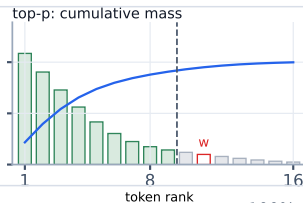

-> **tyranny** rank 19,906

as

-> **dubious** rank 23,071

3 Sampler audit

is w still in the candidate set?

4 WCS

word reachability aggregated over contexts

$$R_{\theta}(w) = 1[\exists c : R_{\theta}(w, c)]$$

$$WCS_{\theta} = N^{-1} \sum_w R_{\theta}(w)$$

reachable contexts

	C1	C2	C3	C4	C5	C6
offenders	○	○	○	○	○	○
tyranny	○	○	○	○	○	○
dubious	○	○	○	○	○	○
circulate	○	○	○	○	○	○
WCS = reachable target words / target words
