

1 Lexical Selection — Identify middle-long tail target lexicon

Target Word Selection (Middle-Long Tail):

offenders	tyranny	dubious	circulate	precipitated
rank 10,104	rank 19,906	rank 23,071	rank 26,691	rank 39,823

2 Context Pairing — Map target words back into human passages

Prefix / Context $C \rightarrow$ Target Word w (PG-19 Source):

... Dessave to hold an inquiry and punish the	$\rightarrow$	offenders	
... perverted into instruments of	$\rightarrow$	tyranny	and oppression
... outlook for his success seemed as	$\rightarrow$	dubious	and uncertain
... write to, when he began to	$\rightarrow$	circulate	his letters of inquiry
... several months was suddenly	$\rightarrow$	precipitated	by the crisis

3 Sampler Audit top-k — Verify if target word survives generation filters

4 WCS Measurement — Aggregate target word reachability to compute WCS

1. Next-Token Reachability:

$$\mathcal{R}_\theta(w, c) \in \{0, 1\}$$

(1 if target w survives filter θ in context c , else 0)

2. Corpus-Level Average Score:

$$\text{WCS}_\theta = \frac{1}{|\mathcal{D}|} \sum_{(w, c) \in \mathcal{D}} \mathcal{R}_\theta(w, c)$$

Conceptual Coverage Matrix:

	c_1	c_2	c_3	c_4	c_5	WCS _{θ}
offenders	✓	✓	×	✓	×	60%
tyranny	×	×	×	×	✓	40%
dubious	✓	×	✓	×	×	40%
circulate	✓	✓	✓	×	✓	80%
precipitated	×	✓	×	✓	×	40%

Average WCS Score

52%
